

SHUBHAM SHRIVASTAVA

Senior Product Manager | AI, FinTech, Asset Management & Compliance

Jersey City, NJ | (224) 578-8986 | shrivastavashubham213@gmail.com | [linkedin.com/in/shubhamshrivastava11](https://www.linkedin.com/in/shubhamshrivastava11)

PROFESSIONAL SUMMARY

Senior Product Manager with 6+ years driving regulatory compliance, AML oversight, and risk-based control assessment across FinTech, MedTech, and financial services environments. Proven ability to evaluate compliance program strengths and weaknesses, translate complex federal securities and Investment Advisers Act requirements into executable strategies, and partner with legal, clinical, and CCO-level stakeholders to strengthen operational due diligence frameworks. Track record deploying technology solutions — including AI-driven guardrails and automated monitoring pipelines — to drive process improvement, reduce regulatory exposure, and deliver measurable outcomes in fast-paced, high-stakes environments.

CORE COMPETENCIES

Regulatory & Compliance: AML/KYC, ISO 20022, PCI-DSS, HIPAA, FERPA, Investment Advisers Act, Federal Securities Law, Asset Management Compliance, Alternative Investments ODD, Fund Manager Due Diligence, Private Funds, Financial Services, Risk Assessment, Control Evaluation, Senior Management Reporting

AI & Technology: LLMs, RAG Pipelines, Claude, Cursor, Agent Frameworks, NLP, Prompt Engineering, Generative AI, LLM Guardrails, Python, Anomaly Detection

Product Strategy: Zero-to-One Discovery, Roadmapping, OKRs, KPI Definition, North Star Metrics, GTM Planning, Pricing Strategy, Competitive Analysis

Execution & Delivery: Backlog Management, Sprint Planning, ICE/RICE, MoSCoW, PRD/BRD Authoring, UAT Lifecycle, Release Management, Agile/SAFe

Analytics & Research: User Research, VoC, A/B Testing, Cohort Analysis, Funnel Optimization, DAU/MAU, LTV/CAC, SQL, Power BI, Amplitude, Mixpanel

Stakeholder Management: Cross-Functional Alignment, Executive Reporting, Risk Communication, Legal & Clinical Partnerships, Attention to Detail, Compliance Oversight, Process Improvement, Technology Solutions, CCO Reporting, Fast-Paced Environment Delivery

ENTREPRENEURIAL EXPERIENCE

Founder & Product Lead • HeyFurnish — AI Home Styling App

Apr 2025 – Present

- **Founded and shipped** a live AI-powered home styling platform end-to-end — from user research and persona definition through Figma wireframing, sprint planning, and full production launch across a React Native mobile app and Next.js web app.
- **Built** a custom computer vision and generative AI pipeline powered by Claude, delivering curated product recommendations across Budget, Balanced, and Premium tiers sourced from Amazon, IKEA, and Wayfair.
- **Conducted structured beta testing with 25+ users**, collecting qualitative and quantitative feedback to iterate on core flows; shipped 15+ features including AR product preview, swipe navigation, save and history, and animated UI components.
- **Defined north star metrics, retention loops, and monetization model** from zero; managed all GitHub merges and pull request reviews, working directly in the codebase alongside engineers and driving measurable UX improvements across the discovery-to-purchase journey.
- **Assessed and continuously improved product controls** — evaluating onboarding drop-off, session quality, and feature adoption through behavioral analytics to proactively identify weaknesses and drive iterative remediation.

PROFESSIONAL EXPERIENCE

Product Manager II — Enterprise AI & Platform • Johnson & Johnson

Jersey City, NJ Oct 2025 – Present

- **Drove product strategy and compliance roadmap** for an AP digital transformation migrating legacy SAP to containerized AWS microservices, delivering \$2.4M in annualized operational savings and reducing financial cycle time by 38% — with full audit trail integrity enforced throughout.
- **Owned zero-to-one discovery and launch** of a production RAG extraction pipeline for vendor invoices; engineered LLM hallucination guardrails that held error rates below 0.5%, reclaiming 400+ analyst hours per month equivalent to 2.5 FTE positions previously consumed by manual compliance review.
- **Defined OKRs, KPIs, and regulatory product roadmap** for a B2B MedTech data platform; managed a 200+ item backlog across legal, clinical, and commercial stakeholders using ICE prioritization, cutting supplier onboarding friction by 25% while maintaining data governance standards.
- **Shipped an AI-driven anomaly detection module** integrated into core ERP APIs, reducing ledger reconciliation mismatches by 40% and cutting month-end financial close by 3 business days — directly strengthening internal audit controls and financial reporting accuracy.

- **Conducted continuous assessment of compliance control environments**; delivered weekly KPI dashboards tracking lead time, defect leakage, and adoption rate to senior leadership, enabling proactive risk identification and evidence-based remediation.
- **Partnered with IAM, network, security, and platform engineering teams** to evaluate control strengths and weaknesses across the compliance program, aligning cross-functional remediation efforts with regulatory change requirements and organizational risk appetite.

Product Manager — Government Compliance • Deloitte Consulting (Client: Maryland Dept. of Education)

Jersey City, NJ Apr 2025 – Sep 2025

- **Defined post-MVP compliance strategy** and phased GTM plan for 6 regulatory reporting modules serving federal and state mandates; aligned stakeholders across multiple government agencies on scope, timelines, and regulatory acceptance criteria.
- **Directed the full UAT lifecycle**; proactively identified and resolved 50+ architectural defects pre-deployment, improving platform data reporting accuracy by 41% and cutting MTTR for high-severity compliance defects from 4 days to 1.6 days.
- **Rebuilt backlog governance** using automated text clustering to deduplicate a 1,200-item compliance repository, improving sprint predictability and lifting engineering velocity by 34%, enabling faster regulatory delivery cycles.
- **Evaluated the compliance environment proactively** to identify improvement opportunities across 6 concurrent regulatory modules; provided clear and concise written and verbal assessments to senior agency leadership on control gaps and remediation priorities.

Product Manager — AML & Regulatory Compliance • Cygnus Compliance (Client: Bank of China) New York, NY

Jan 2025 – Mar 2025

- **Led GTM execution** of a B2B regulatory reporting suite for ISO 20022 and PCI-DSS compliance, processing \$50M+ in institutional transaction volume within 8 weeks; managed agile delivery of Python-based AML transaction classification models with programmatic PII anonymization enforced throughout the pipeline.
- **Automated high-volume transaction monitoring workflows** using Python classification models, reducing AML review cycle time by 20% while maintaining strict PII anonymization — directly reducing regulatory exposure and strengthening compliance controls.
- **Resolved compliance submission friction** through behavioral drop-off analysis and UX redesign, driving a 60% reduction in support escalations and lifting filing success rates from 85% to 97%, improving overall regulatory submission reliability.
- **Collaborated with compliance, legal, and engineering stakeholders** to assess regulatory change requirements under federal securities frameworks; translated complex mandates into developer-ready specifications and acceptance criteria aligned with institutional risk standards.

Product Manager — D2C Mobile Platforms • Digital iTechnology Austin, TX Mar 2024 – Dec 2024

- **Grew DAU/MAU by 40%** by leading discovery and GTM launch of churn-prediction models and event-triggered notification features, driving total app installs past 75,000 through data-driven product decisions.
- **Increased 6-month retention from 46% to 61%** via behavioral cohort analysis, customer journey mapping, and deployment of a custom recommendation engine grounded in rigorous user research.
- **Cut code-to-production timelines from 6 weeks to 3 weeks** by embedding QA into agile sprints and standardizing Gherkin acceptance criteria across the team, improving delivery predictability and reducing defect leakage.
- **Improved onboarding conversion by 33%** through systematic A/B testing and multivariate experimentation on landing page layout and user flow design, demonstrating analytical problem-solving applied to complex product challenges.

Business Analyst — Banking, KYC & Compliance • Worldsoft Technologies Bhopal, India Jan 2018 – Nov 2021

- **Mapped end-to-end KYC and digital onboarding workflows** for a banking client; authored REST API specifications for payment wallet integrations and credit scoring flows, extending digital banking access to 30,000+ previously unbanked customers and boosting activation rates by 31%.
- **Built real-time SQL reporting dashboards** tracking order throughput, delivery SLA compliance, and transaction anomalies across banking, FMCG, and retail clients; cut helpdesk ticket volume by 45% and reduced manual audit time by 20%.
- **Translated regulatory and business requirements** across 4 concurrent workstreams into BRDs, user stories, and developer-ready acceptance criteria; facilitated sprint reviews and stakeholder alignment sessions across banking and retail verticals.
