SUMMARY

Product leader with 8+ years of experience across enterprise platforms, AI-enabled products, and 0→1 delivery in healthcare, financial services, government, and commerce. Have led global initiatives from early discovery and roadmap definition through launch, adoption, and operational support, with hands-on exposure to LLMs, RAG, AI agents, APIs, data platforms, and cloud environments.

EXPERIENCE

Johnson & Johnson, Product Manager II · New Jersey, US

Oct 2025 – Present

Manage product direction and delivery across 20+ enterprise AI, payments, data, and transformation initiatives within a \$75M+ GTS/GFS portfolio, overseeing and working alongside teams across North America, South America, Asia Pacific, and EMEA.

- **JAIDA enterprise AI / invoice automation**: led the product work across LLM, RAG, and NLP workflows. The program reclaimed 400+ analyst hours per month, reduced invoice-extraction errors from ~12% to <2%, and cut manual review through guardrails and human-in-the-loop checks.
- **Global SAP S/4HANA → AWS modernization**: coordinated roadmap decisions, migration sequencing, stakeholder alignment, and rollout across five regions. The program delivered \$2.4M+ in annual savings and improved Accounts Payable processing across previously fragmented regional workflows.
- **IRIS MedTech data platform**: shaped the product vision, OKRs, discovery priorities, and supplier journeys, turning customer and operations feedback into roadmap changes that reduced supplier-onboarding friction by ~25%.
- **Enterprise payments & platform portfolio**: coordinated GFS, AP, eMarketplace, data, and integration workstreams across business, engineering, finance, and regional teams, while tracking dependencies, risks, scope, and portfolio updates for leadership.
- **Operational intelligence & analytics**: built Python and Power BI reporting for SAP/AP workflows to highlight stuck invoices, exception patterns, and service-performance trends, giving operations and leadership teams better day-to-day visibility.

Deloitte, Product Manager (Contract) · Remote, New Jersey

Apr 2025 – Oct 2025

Led delivery of the MSDE Scholarship Portal, a statewide compliance and financial-aid platform used across 15+ public-sector agencies for application, eligibility, award, reporting, and case-management workflows.

- Ran UAT and go-live readiness across 6 modules, worked through 50+ priority defects, and cleared reporting and data-quality issues before launch.
- Reworked a 1,200+ item backlog with AI-assisted clustering and product triage, removing roughly one-third as duplicates and giving the delivery team a clearer set of priorities.
- Introduced severity-based SLA triage and a regular operating cadence, cutting resolution time for high-severity issues by more than half and improving visibility across agencies.
- Worked with product, QA, engineering, and agency stakeholders to improve data quality, reporting accuracy, and operational reliability while reducing time-to-resolution.

Cygnus Compliance, Product Manager · New York

Jan 2025 – Mar 2025

Delivered a 0→1 AML/KYC compliance platform for a Tier-1 global bank's US correspondent-banking operation within an 8-week regulatory deadline.

- Launched an end-to-end compliance engine covering ISO 20022, KYC/AML screening, sanctions monitoring, case workflows, and regulatory reporting, improving filing success from ~85% to ~97% across \$50M+ in transaction volume.
- Led the SWIFT MT-to-MX / ISO 20022 migration requirements, converting regulatory and operations needs into prioritized workflows, acceptance criteria, and release sequencing for product, engineering, and compliance teams.
- Partnered with data engineering on Python-based AML classification and PII anonymization to reduce false-positive review effort and improve analyst efficiency without weakening compliance controls.

Digital iTechnology, Product Manager (Contract) · Austin, TX

Mar 2024 – Dec 2024

- Helped scale a D2C mobile platform to 75K+ installs. Used funnel analysis, customer research, and 5 A/B tests at 95% confidence to improve onboarding conversion from ~41% to ~74%.
- Improved 6-month retention from ~46% to ~61% by prioritizing activation, lifecycle, and usability changes based on behavioral data and experiment results.

Openlogix (a K2 Company), PM Intern · Bloomfield Hills, MI

Jun 2023 – Sep 2023

- Supported a 0→1 digital-banking and robo-advisory MVP, translating customer and business needs into product flows, backlog priorities, and release-ready requirements that supported \$2.5M in managed assets.
- Worked with product, design, and engineering on discovery, user journeys, feature requirements, and acceptance criteria for onboarding, advisory, and portfolio experiences.

Oakland University, Product Manager · Auburn Hills, MI

May 2022 – Apr 2023

- Launched a FERPA-compliant financial-aid self-service portal that increased student self-service adoption by ~45% across scholarship, aid, and account-servicing journeys.
- Connected financial-aid and student systems through Salesforce and MySQL, coordinating requirements, data synchronization, testing, and adoption across university teams.
- Coordinated service-flow improvements and releases, turning advising and operations pain points into prioritized enhancements, UAT scenarios, and adoption support.

Worldsoft Technologies, Product Manager · India

Jan 2018 – Nov 2021

- ▶ Owned KYC/onboarding, payment-gateway integrations, and REST API requirements for a 30K+ customer digital-banking and payments platform, translating regulatory and operational needs into BRDs, user stories, and release priorities.
- ▶ Worked with engineering and operations on payments, reconciliation, reporting, and fraud-control improvements that reduced manual support effort and improved transaction reliability.
- ▶ Delivered merchant onboarding and commerce integrations, including POS-to-inventory and SQL reporting improvements across banking and retail clients, contributing to an ~18% increase in merchant revenue.

FOUNDER EXPERIENCE

LOCUS AI, Founder · New York, US

May 2026 – Present

Building LOCUS AI 0→1, an MCP-native organizational-memory layer with 20+ workplace integrations/connectors. The product preserves decisions, rationale, changes, ownership, and source evidence so people and AI agents can retrieve grounded context with the right permissions.

- ▶ Lead product vision, roadmap, discovery, and GTM with a distributed 15+ person team across backend, frontend, AI/data, product, and design. Completed 30+ customer interviews, expanded controlled adoption to 40+ users, and are progressing B2B enterprise pilots.
- ▶ Expanded the integration layer to 20+ connectors and helped define the ingestion approach around a common event model, deduplication, raw-event storage, queues/workers, and source deep links.
- ▶ Led development of multi-level organizational hierarchy and role-based access control (RBAC), scoping memory by organization, team, project, user, and agent to support least-privilege enterprise access and governance.
- ▶ Shaped the AI and memory architecture across Claude, hybrid RAG, pgvector/PostgreSQL, and MCP, with semantic retrieval, metadata, structured memory, citations, permission-aware access, evaluation, and hallucination guardrails.
- ▶ Defined the multi-agent product architecture with a master PM agent and specialist developer, tester, data analyst, and ML agents; LangGraph handles orchestration while MCP provides controlled access to tools, models, and Locus AI memory.
- ▶ Added enterprise trust requirements including human approval gates, provenance, audit trails, source citations, permission boundaries, decision-conflict checks, model evaluation, and hallucination guardrails for higher-stakes use cases.

EDUCATION

M.S., Information Technology Management · Oakland University, Michigan, USA · 2023

B.E., Computer Science · RGPV, Bhopal, India · 2017

SKILLS

Product: Product Strategy · 0→1 Product Development · Roadmapping · Product Discovery · Customer Research · Prioritization · OKRs · Product Analytics · Experimentation · GTM · Stakeholder Management · Cross-functional Leadership · Agile/Scrum

AI & Data: LLMs · RAG · AI Agents · MCP · Prompt Engineering · AI Evals · Hybrid Retrieval · Python · SQL · pgvector / PostgreSQL · Data Quality · Human-in-the-Loop

Platforms & Tools: REST APIs · OAuth 2.0 · AWS · Supabase · FastAPI · Salesforce · Jira · Power BI · Figma · Claude API · SAP S/4HANA

Certifications: Certified Scrum Product Owner (CSPO) · Certified ScrumMaster (CSM) · Advanced Google Analytics · Product Analytics
